**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a method for measuring conductance of a sample and generating a lift off curve, classified in class 324, subclass 239.
- II. Claims 3 - 6, drawn to a chemical mechanical polishing system for polishing a sample with a polishing agent and the monitoring sample, classified in class 451, subclass 5.

2. The inventions are distinct, each from the other because:

3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claims in group I indicates that the subcombination of group I does not require the specific apparatus of the combination of group II. The subcombination has separate utility such as subcombination of group II can be used for measuring the thickness of a semiconductor wafer.

Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. A telephone call was made to Mr. Yawata on 06/10/04 to request an oral election to the above restriction requirement, but did not result in an election being made.
